

Grind Plate/s

1. Grind plates for skis and snowboards
2. The Grind plate/s can be removed and replaced.
3. The grind plate/s may be made of metal, plastic or composite materials.
4. The grind plate/s can vary in flexibility to complement a ski or snowboard.
5. The mounting system for the grind plate/s may consist of: screws, bolts, nuts, clips, tongue and groove and any other method needed to accommodate specific ski and snowboard designs.

Abstract

A ski or snowboard with removable and interchangeable edge sections. These edge sections are specifically designed to allow a ski or snowboard to have the best edge combination for traditional use as well as for sliding or grinding on objects. The fixed or removable grind plate system protects a ski or snowboards edges from damages due to sliding or grinding on objects or surfaces.
